PROCEEDINGS

Microelectronics Measurement Technology Seminar

February 6-7, 1979
San Jose Hyatt House, San Jose, CA

organized and produced by
Benwill Publishing Corporation
1050 Commonwealth Ave., Boston, MA 02215
(617) 232-5470

Director, Susan Chouinard
Coordinator, Sheila Goggin
Assistant Coordinator, Kate Fitzgerald

Microelectronics Measurement Technology Seminar

TABLE OF CONTENTS

Formal Papers

SESSION I. Measurement of Surface Uniformity for VLSI

David S. Perloff, Signetics Corp., *Session Leader*

Accurate Efficient LSI Process Answers from Nominally Identical Closely Spaced Test Structures, William E. Ham, RCA Laboratories 1

Techniques for the Evaluation and Display of VLSI Process Uniformity, Frederick E. Wahl and David S. Perloff, Signetics 17

Comprehensive Test Patterns with Modular Test Structures: The 2 by N Probe-Pad Array Approach, Martin G. Buehler, National Bureau of Standards 27

SESSION II. Techniques to Characterize Charges in Oxides

Gerald M. Oleszek, University of Colorado, *Session Leader*

Properties and Measurements of Charges Associated with the Thermally Oxidized Silicon System, Bruce E. Deal, Fairchild Camera & Instrument Corp. 39

High-Frequency C-V Plot as a Process Control Tool, C.T. Huang and Steve Mylroie, Signetics 71

A Desktop-Computer Based System for Characterization of MOS Devices, Ebrahim Khalily, Albert M. Lin and Robert W. Dutton, Stanford University; Hal Daseking and Robert A. Schuchard, Hewlett-Packard Co. 85

SESSION III. Dopant Profiles in Silicon

Conrad J. Dell'Oca, Hewlett-Packard Laboratories, *Session Leader*

Dopant Profiling with Spreading Resistance Analysis, David H. Dickey, Solecon Laboratories 102

Can You Trust a Spreading Resistance Profile? Steve W. Mylroie and Frederick E. Wahl, Signetics 111

Automatic Spreading Resistance Profiling, Don D'Avanzo, Christopher R. Clare and Conrad J. Dell'Oca, Hewlett-Packard Laboratories 121

C-V Profiling, Dirk Bartelink, Xerox Research Laboratories 140

Sputtering in the Surface Analysis of Solids: A Discussion of Some Problems, (Abstract Only), John W. Coburn, IBM . . . 157

Recent Advances and Applications of SIMS to Electronic Materials, Charles A. Evans, Jr., Charles Evans & Associates . . . 158

Instrumental Neutron Activation Analysis of Semiconductor Silicon, Joe Keenan, Texas Instruments 173

Applications of Auger Depth Profiling to Problems in Silicon Technology, Richard J. Blattner, University of Illinois 185

MeV Ion Backscattering as a Profiling Technique in Silicon, (Abstract Only), Thomas W. Sigmon, Stanford University . . . 203

SESSION IV. Laser Annealing

O.D. Trapp, Technology Associates, *Session Leader*

Laser Annealing, Walter L. Brown, Bell Telephone Laboratories 204

SESSION V. On-Line Automated Process Measurement & Control

Robert G. Stewart, Stewart Research Enterprises, *Session Leader*

On-Line Process Control Using a Tree Structured Network, Christopher R. Clare, Hewlett-Packard Laboratories 215

Progress in Automatic Test Equipment for In-Process Test of Planar Devices, William H. Mayo, IBM Data Systems Division 219

On-Line Semiconductor Device Characterization Using Microcomputer Controlled Instruments, Barton J. Gordon, Materials Development Corporation 247

SESSION VI. Photoprocess Measurements & Controls

Colin Knight, Advanced Micro Devices, *Session Leader*

Optical Linewidth Measurement — A Basic Understanding, Diana Nyyssonen and John M. Jerke, National Bureau of Standards 251

Analysis of Photoprocess-Induced Non-Linear ΔL Variations in MOSFETs by Device Transductance Measurements, Gerald M. Oleszek, University of Colorado 267

Computerized Optical System for Precision Line Width Measurements, Vincent Coates, Nanometrics 273

Workshops

Alpha-Particle Measurement Techniques, Timothy C. May, Intel Corp., *Workshop Leader* 288

NBS Publications for Optical Line Width Measurement: Techniques and Procedures for IC Photomasks and Wafers, Diana Nyyssonen, National Bureau of Standards, *Workshop Leader* 297

VLSI Process Monitoring: Current Practice/Future Trends, David S. Perloff, Signetics Corp., *Workshop Leader,* with Martin G. Buehler, National Bureau of Standards, William E. Ham, RCA Laboratories and W. Murakami, National Semiconductor Corp. 300

Bus and Communication Protocol for Processing and Measurement Equipment, (Abstract Only), Robert G. Stewart, *Workshop Leader,* with William H. Mayo, IBM Data Systems Division, Christopher R. Clare, Hewlett-Packard Laboratories, Maris Graube, Tektronix and Barton J. Gordon, Materials Development Corp 323
